PROFESSIONAL SUMMARY

Results-driven Biotechnology graduate with a strong interdisciplinary foundation in Artificial Intelligence, Data Science, and Life Sciences. Experienced in Python, Machine Learning, Data Analysis, Large Language Models (LLMs), Prompt Engineering, Retrieval-Augmented Generation (RAG), Agentic AI, AI Automation Workflows (n8n), and Generative AI. Hands-on experience developing AI-powered applications, machine learning models, chatbots, workflow automation, and data-driven solutions, complemented by research in microbial characterization and hydrolytic enzyme isolation. Certified in AI & Data Science (SMIT) and the ACT AI Youth Program (NAVTTTC/HEC-recognized). Passionate about leveraging AI and emerging technologies to solve real-world problems through innovative, data-driven solutions.

EDUCATION

BS Biotechnology | Dow University of Health Sciences

Graduated 2026

Relevant Coursework: Statistics, Microbiology, Bioinformatics,

CERTIFICATIONS & TRAINING

AI & Data Science Program | Saylani Mass IT Training (SMIT)

2026 – Present

Comprehensive training in Python, ML, deep learning, data visualization, Agentic AI, Generative AI

ACT AI Youth Program | NAVTTTC – HEC Recognized

2026 – Present

Government-accredited program in artificial intelligence and emerging technologies

Microsoft Excel | Coursera

Completed

Pivot Tables, Dashboards, Data Handling & Visualization

Data Entry & Basic Analysis | SPSS Certification

Completed

Statistical data entry, cleaning, and analysis using SPSS

PROJECTS

AI Agents & Workflow Automation

- Built autonomous AI workflows using **n8n**, integrating LLM APIs (OpenAI, Gemini, Claude) for task automation.
- Designed AI agents capable of executing multi-step workflows and API-based actions.

LLM & Generative AI Applications

- Developed AI chatbot applications using prompt engineering, NLP, and Generative AI.
- Implemented Retrieval-Augmented Generation (RAG) concepts for context-aware question answering.

Machine Learning & Data Analytics

- Developed supervised and unsupervised machine learning models using Python and Scikit-learn.
- Performed data cleaning, preprocessing, feature engineering, model evaluation, and visualization.
- Created interactive dashboards in Power BI and Excel to communicate data-driven insights.

TECHNICAL SKILLS

- Python (Numpy, Pandas, Matplotlib, scikit learn etc)
- Jupyter notebook
- Debug and fix error in existing code
- Machine Learning (Supervised and Unsupervised)
- Prompt Engineering
- Retrieval-Augmented Generation (RAG)
- LLMs
- N8n Automation workflows
- AI chatbots
- Agentic Ai Applications
- Generative AI applications
- AI API Integrations (OpenAI, Claude, Gemini)
- Data Analysis and Visualization
- Data Cleaning and Preprocessing
- Statistical Analysis
- MS Excel and Data Handling (pivot Table, Dashboards)
- Power BI (dashboards)
- SQL basics
- Research and Scientific Writing
